
PRODUCT TECHNICAL INFORMATION

- Product:** AQUAPRO EZ
- Description:** The AQUAPRO EZ is a proprietary blend of specifically selected bacterial species that have application in environmental management primarily by digest sludge and accumulated organic matter.
- Packaging:** AQUAPRO EZ is packaged in 8 oz biodegradable bags in plastic pails of variable weight.
- Uses:** AQUAPRO EZ is for targeted delivery to problem areas in ponds, slow moving streams, small lakes, reservoirs and any body of water where organic matter can accumulate. AQUAPRO EZ are added fish and shrimp ponds where they settle on the pond bottoms and the bacterial spores germinate, multiplying to high numbers at the site where they are added.
- Storage:** Product must be kept dry, sealed in original containers where possible until use. Moisture can cause the bacteria to germinate. Store between 5 and 40 C. Ideal temperature of storage prior to use is room temperate (25-28 C).
- Suggested Use:** AQUAPRO EZ, add 6 packets (3 pounds) to problem areas. Every two weeks thereafter add two bags (one pound) in areas where sludge accumulates historically or in problem areas. Continue until final week prior to harvest. More bags can be added as required.
- Disclaimer:** Due to the many factors that impact end use results, all of our products are sold with the understanding that the end-users conduct their own tests to determine the suitability of our products for their applications. No statements contained herein are to be construed as express or implied claims, representations or warranties.
